Advancing Farm to School: Lessons from the Field

Case Studies and Strategies for Successful Farm to School Programs

By Carrie Sedlak, in Collaboration with Wisconsin Community Transformation Grant Recipients
Advancing Farm to School: Lessons from the Field

About this Resource

In 2011, fourteen organizations in Wisconsin received US Centers for Disease Control and Prevention (CDC) funding, as distributed through the Wisconsin Clearinghouse, to increase access to healthy food systems in their regions (see italicized section below for more information). Community Transformation Grant recipients were asked to prioritize farm to school as the main strategy for achieving healthy food systems access and obesity prevention. The development of secondary strategies, including community gardens and farmers markets, were also encouraged.

Each of the fourteen communities started work under the Transformation grant in very different places, ranging from having just started farm to school efforts to already having an entire branch of a non-profit devoted to farm to school. Throughout the duration of the grant period, each community built and strengthened their farm to school program in distinct and innovative ways, based on unique community assets and coalitions. This resource attempts to capture and communicate many of the valuable lessons learned throughout this multi-county capacity building process.

The information in this guide was gathered through nearly thirty interviews with grant coordinators and key partners from each county. Each interview was transcribed and then separated and categorized by topic, so that the “lessons learned” portion of the chapters could be informed by the experience of all fourteen communities. Interviews were conducted in the summer and early fall of 2014, and the resource was written and assembled between the summer and spring of 2014-2015.

Each chapter of Lessons from the Field contains grantee-focused case studies, a series of distilled “lessons learned”, and a resource section that highlights those tools and resources that were highly recommended by both community members and experts in the field.

This resource was created in fulfillment of a graduate Capstone project in the Departments of Public Health and Urban and Regional Planning at the University of Wisconsin-Madison.

The Community Transformation Grant, awarded in the fall of 2011 by the US Centers for Disease Control and Prevention, seeks to build community capacity to prevent chronic disease. In Wisconsin, funds are being used to support communities as they pursue evidence-based strategies to prevent obesity through food system work and physical activity, reduce tobacco use, and improve screening for high blood pressure and cholesterol. Wisconsin’s initiative focuses in particular on changing systems and policies that create opportunities for all Wisconsinites to make healthy choices easier.

This resource was supported in part by the CDC’s Community Transformation Grant Program, which was made available through the Prevention and Public Health Fund of the Affordable Care Act to the Board of Regents of the University of Wisconsin System: Grant Number 3597; PI: Sarah Van Orman.
Table of Contents

Chapters

1) Coalitions & Capacity Building................................................................. Page 1
   i. Crawford County: Community-Initiated Support for Farm to School .......... 1
   ii. Columbia County: Informed Capacity Building .................................. 3

2) Solving the Local Food Puzzle................................................................. Page 8
   i. Marathon County: Ramping Up to source Direct from the Farm .............. 8
   ii. Wood County: A Story of Aggregation and Adaptation ....................... 10
   iii. La Crosse County: The Coop to Cafeteria Chicken Garden .................. 12
   iv. Dane County: Systematizing Procurement through a Summer Pilot Program ... 13

3) Establishing a Successful Harvest of the Month........................................ Page 15
   i. Brown County: Cultivating a Sustainable Harvest of the Month ............ 15
   ii. Vernon County: An Ever-Evolving Recipe for Success ......................... 18

4) Integrating Farm to School into School-Based Policies............................. Page 22
   i. Wood County: Embracing Redirection to Achieve Policy Goals .............. 22

5) Cultivating Prosperous Community Gardens........................................... Page 28
   i. Monroe County: “Serving” Vegetables to the Community ...................... 28
   ii. Kenosha County: Paying it Forward, One Garden at a Time .................. 30

6) Striving for Farm to School Sustainability.............................................. Page 33
   i. Manitowoc County: Sustainability as the Measure of Success ............... 33
   ii. Kenosha County: The Multiplier Effect of Community Partnerships .......... 34
   iii. Vernon County: The Value of Internal Support and Fundraising ............ 35

I would like to extend utmost gratitude to the grant coordinators, growers, teachers, coalition leaders and state department staff that were kind enough to share their stories and lend their expertise to the creation of this guide.

The fourteen grantee organizations are as follows:

Columbia County Local Foods Collaboration, re:TH!NK Winnebago’s Healthy Living Partnership, Healthy People of Kenosha County, LaCrosse Healthy Living Collaboration, Healthiest Manitowoc County, Marathon County, Live54218, Driftless Wisconsin Grown, REAP Food Group, Monroe County Schools on the Go, Vernon County Farm to School, Central Rivers Farmshed, Transform Rock County, Get Active Wood County
